

Petition to Substitute another Practicum for WST4941c

The Health Disparities in Society minor requires that students take WST4941c, a 3-credit Practicum in Health Disparities, as a requirement for graduation. Occasionally, students may substitute a Practicum or Internship offered in another department or college for WST4941c, provided that the substituted experience

- entails 135 hours within one semester, and earns 3 credits
- focuses on Health Disparities
- is approved in advance by Dr. Laura Guyer, the Instructor of record for WST4941c

In addition, students whose petitions are approved will be required to complete the reflection/discussion board assignments offered each week in WST 4941C.

Students seeking to substitute another Practicum for WST4941c should complete this form and bring it to Dr. Guyer for approval **during their advance registration window in the semester BEFORE they plan to be at the Practicum site**. Petitions received late in the semester are less likely to be considered or approved.

Name: _____ UF ID: _____

Year: (1st, 2nd, etc.) _____ Major: _____

Class to be substituted for WST4941c (course prefix and number): _____

Proposed site for substitute Practicum/Internship: _____

Supervisor name at proposed site: _____

In the space provided, briefly explain the work you will do at your Practicum site, and discuss how it engages with the issues addressed in the Health Disparities in Society minor:
